EssayHave.com is legit, but I discovered that quality is not their first priority. The research I performed to write this review resulted in a confirmation of the many negative Essay have reviews I read outside the website. Even so, the site shares some ratings for different types of papers and subjects, and they all seem to be perfect. Which one is the real picture about this company? Read on to find this out.

## Services Review

At the moment I was writing my Essayhave review, the site has a Services page, but it does not open. Everything else on the site is responsive and loads rapidly, but this page cannot be accessed. This meant that, in order to see the services list, I had to check the ordering form and see what you can select for ordering.

I must say, the list is not perfect. It is far from a full list, but the most popular papers are listed there. If you don't mind this, the deadline options seem good, so this company would be a viable source for most papers you'll get assigned. However, if you do get some less-popular paper to write, you'd have to look elsewhere.

## **Prices Review**

The prices at Essay Have are realistic - they are neither cheap nor expensive, and I like the difference between the deadlines and academic levels. Still, here is the fact that this company does not cater to the needs of all students, because the highest academic level they offer assistance for is Master's. So, PhD students also need to seek assistance elsewhere.

To give you a picture of what pricing to expect, I ordered an essay for Master's level and deadline of 5 days. The original price was \$26 for a page, and because there is no first-time discount, I paid the full price. There is a loyalty program you can try and reach to get 5%, 10%, or 15% lifelong discounts, but you first have to spend quite a big amount on the site before you are considered a regular customer and entitled to the smallest discount. To get the biggest discount of 15%, you need to spend over \$2000!

## **Content Quality**

The content quality evaluation was the biggest disappointment of all. To write detailed Essayhave review I ordered a paper. I did not get a discount so the price was not as attractive as I believed it would be, so I expected a great paper. After all, this is what the site suggests if you take the time to read what the creator has to say.

I concluded that the writers' expertise level is very low and that EssayHave has very bad criteria for hiring employees. Instead of focusing on hiring native, fluent and qualified writers, they seem to have hired writers that are not-so-fluent in the language and provide below average quality content.

I should have assumed this when I noticed the lack of a PhD offer in the list. Essay Have probably decided to leave this option out because they didn't hire writers who are qualified to write for such a high level. Unfortunately, my essay showed that the writers employed here aren't good for Master's level papers, either.

## **Customer Support Agents**

The support system is responsive, but it did not help me a lot with this problem. Despite the mention and information about the various guarantees this company is said to provide, all I got was a free revision that took over 24 hours to get to me. I demanded a refund based on the low quality and poor language used in the paper I paid a high price for, but all I got was this one revision that made me miss the original deadline.

## EssayHave review - Final Thoughts

EssayHave.com has no troubles in meeting deadlines, but everything else seems to be out of order. Low paper quality and poor English in my paper were just two of the issues we had. Add the bad customer support and the lack of discounts to this list, and you get a full list of reasons why not to choose this company.

***Because of this, I believe that this is not the right company to work with, and suggest you do not order your essays at EssayHave.***
